

Revolutionary Formaldehyde Free series from AkzoNobel

FF from AkzoNobel is a new series of acid-curing products delivering high-quality results without the use of formaldehyde. It's a system that's Formaldehyde Free, and isocyanate-free with no odour to the end user on either coated furniture or fittings.

FF has good spray application and an extended pot-life of five days and is compatible with the AkzoNobel tinting system. FF also has excellent adhesion to wooden substrates including UV primed surfaces. Drying, viscosity and gloss can easily be adjusted with different additives.
