

Coatings for OEMs

Protective coating solutions for the Water and Waste Water market

Understanding our customers

Choosing the right protective coating can be a minefield. The correct choice can maximise productivity, while offering optimal protection to the asset owner. It can also prevent painful delays and product failures.

With decades of experience across a range of markets, including Oil and Gas, Power, Mining and Infrastructure as well as Water and Waste Water, we aim to make coating selection as simple as possible. From huge tanks and pipelines to valves and pumps, our products offer excellent corrosion protection whether exposed to atmospheric or extreme environments.

In the Water and Waste Water market, the following is just a small selection of equipment we can protect:

- Tanks
- Pipes
- Railings
- Clarifiers
- Sluice Gates
- Digesters
- Sedimentation Tanks
- Impellers
- Pumps
- Valves
- Filter Presses
- Filtration Units

Increase productivity, save money

Our products are specially designed and rigorously tested to meet the needs of our OEM customers. Within our range we have a system that meets your requirements. Features include:

- Simple surface preparation
- Superior abrasion resistance
- Easy application
- Exceptional chemical and corrosion resistance to withstand extreme environments
- Uncomplicated systems
- Excellent aesthetics when required
- Good coverage
- Available in a range of colours to meet your needs
- Faster cure times

We operate where you do

With a global distribution network and locations in more than 50 countries, we can supply you with the product you need, when you need it and in the volume you require.

You can also be sure that the product applied in the shop will be the same product used for any subsequent application on site, wherever in the world that may be.

Innovative Product Range

- **Interthane®**: a polyurethane finish which provides excellent durability and long term recoatability
- **Interfine®**: a high performance, high solids inorganic hybrid finish offering superior gloss and colour retention
- **Interline®**: a range of epoxy, phenolic and novolac linings offering protection against a wide range of chemicals
- **Interzone®**: heavy duty coatings for immersion conditions with excellent resistance to mechanical damage
- **Intersleek®**: easy clean, non toxic foul release technology
- **Ceilcote®**: extreme heavy duty chemical and corrosion resistant coating solutions for severe service environments
- **Enviroline®**: speciality linings that provide long term durability and protection against chemical attack. Fast return to service
- **Interseal®**: a high build, high solids surface tolerant epoxy, providing excellent anti-corrosive protection in both atmospheric exposure and immersion service.

Technical Support

Our highly trained **Technical Service** professionals are there to help you throughout the application process to make sure you get the best results.

We can advise on:

- Optimal shop conditions for application
- Correct surface preparation and application methods to maximize productivity and minimize product failures
- Ways to optimise the coating process and reduce paint consumption.

Regulation and the Environment

We take our environmental responsibility seriously and have led the market in the development of coatings that are safer both to the applicator, the end user and the general environment. We offer products that have excellent quality and performance, whilst still meeting reduced VOC levels.

Specialist lining products are available, suitable for use with potable water. These have been thoroughly tested and are approved to one or more of the recognised international standards:

- NSF/ANSI 61
- BS 6920
- AS/NZ 4020.

Track Record

We have successfully supplied coatings to the Water and Waste Water market for over 30 years. Our aim is to work closely with our customers, large and small, to understand their challenges and meet them.

A Global Organisation

It's important to know that the company supplying you with paint today will still be there tomorrow. From its' inception in 1777, AkzoNobel has grown to become the world's largest paints and coatings company. As part of the Akzo group, we can give you that confidence.
